

Homework Due:

Domino Battle

Created by Box Cars and One Eyed Jacks

1. You will need your dominoes.
2. You will need to play this game with a partner.
3. Place all the dominoes face down. Each partner flips one domino over.
4. Tell your partner how many dots are on your domino "I have _____."
5. Your partner tells you how many dots are on his/her domino.
6. You both decide who has the greatest number of dots and say "_____ is greater than _____."
7. The person with the greatest number of dots on his/her domino gets to keep both dominoes.
8. If you both flip over a domino with the same number of dots, you will have a Battle.
9. Take 3 dominoes from the face down pile and stack them between you and your partner. Now you take another domino and flip it over. Your partner will do the same. Tell your partner what you have and your partner tells you. Whoever has the greatest number gets the dominoes plus the three you used to battle and the original two that started the battle.

Please encourage your children to use the math talk "I have _____." "_____ is greater than _____."

There is a video available so you can watch how to play the game if you have any additional questions.
