

Homework Due:

Knock Out

Created by Box Cars and One Eyed Jacks

1. You and your partner need to write the numbers 1-12 across your piece of paper.
2. Roll your dice. Add the two dice together to find the sum. Now you can choose to cross out whichever two numbers you want as long as they equal the sum you rolled.
3. Now roll again and cross out another two numbers that equal your sum.
4. Keep rolling and crossing out the numbers until you cannot cross out any other numbers.
5. Add up the number that you didn't cross out.
6. Now it is your partner's turn to roll. He/she follow the same directions. Whoever has the least amount left wins that round.

There is a video available so you can watch how to play the game.
