

Homework Due:

Play Clockominoes

1. Place all the dominoes face down
2. Pick a domino
3. Figure out how many dots are on the domino and place it on your Clockominoes page.
4. If you get a domino that has the same number of dots as one that is already on your page, stack it on top of the original domino.
5. The domino with no dots goes in the middle.
6. You should play more than once

The goal is for the children to be able to start seeing groups within the dots and counting on to find the total. We know that some children are already working on their math facts, so this is also a great game to reinforce addition facts.

There is a video available so you can watch how to play the game if you have any additional questions.
