

## Homework Due:

### Dozen Dice

1. Each player rolls two dice on his/her turn.
2. The object of the game is to be first to get the numbers in order from 1 to 12.
3. Players can use the numbers from an individual die, or from a total of both dice together.
4. If a player on his/her turn gets one of the numbers he/she is going for (such as getting a 1 on the first turn), he/she writes this down on the paper.
5. On his/her next turn tries for a 2.
6. It is possible to get the next two numbers in one roll (for example if the player then rolls a 3 and a 4).
7. If on a turn, a players doesn't get the next number he/she is going for, the turn passes and the player has to wait for the next turn to try again.

This is a good game for counting, sequencing, and adding numbers.

There is a video available so you can watch how to play the game.
